

Erasmus+

New employment opportunities in the context of digitalization: The case of Greece

ARTEMIS SAITAKIS
DIRECTOR, SCIENCE & TECHNOLOGY PARK OF CRETE

EXPERT CONFERENCE, JOB DEVELOPER PROJECT
BOCHUM, JUNE 6-7, 2018

Funded by the
Erasmus+ Programme
of the European Union

Outline of the presentation

[?] Digitalization

[?] Going digital: transformation of work

[?] Workforce of the future

[?] The Greek case

- Examples from Greece***

Digitalization and Future Jobs

Trends & Facts

- ❑ Work is always changed (telegraphists, town criers, lamplighters, ... even travel agents will disappear in the near future)*
- ❑ Lots of current works are awful*
- ❑ Machines need people (they can do a lot of things, but they are tools)*
- ❑ Curiosity and imagination of people*
- ❑ Technology is upgrading all aspects of the society*
- ❑ Technology solves, but also creates problems*

The changing nature of a career

Length of career

60 to 70 years

Average tenure in a job

4.5 years

Half-life of a learned skill

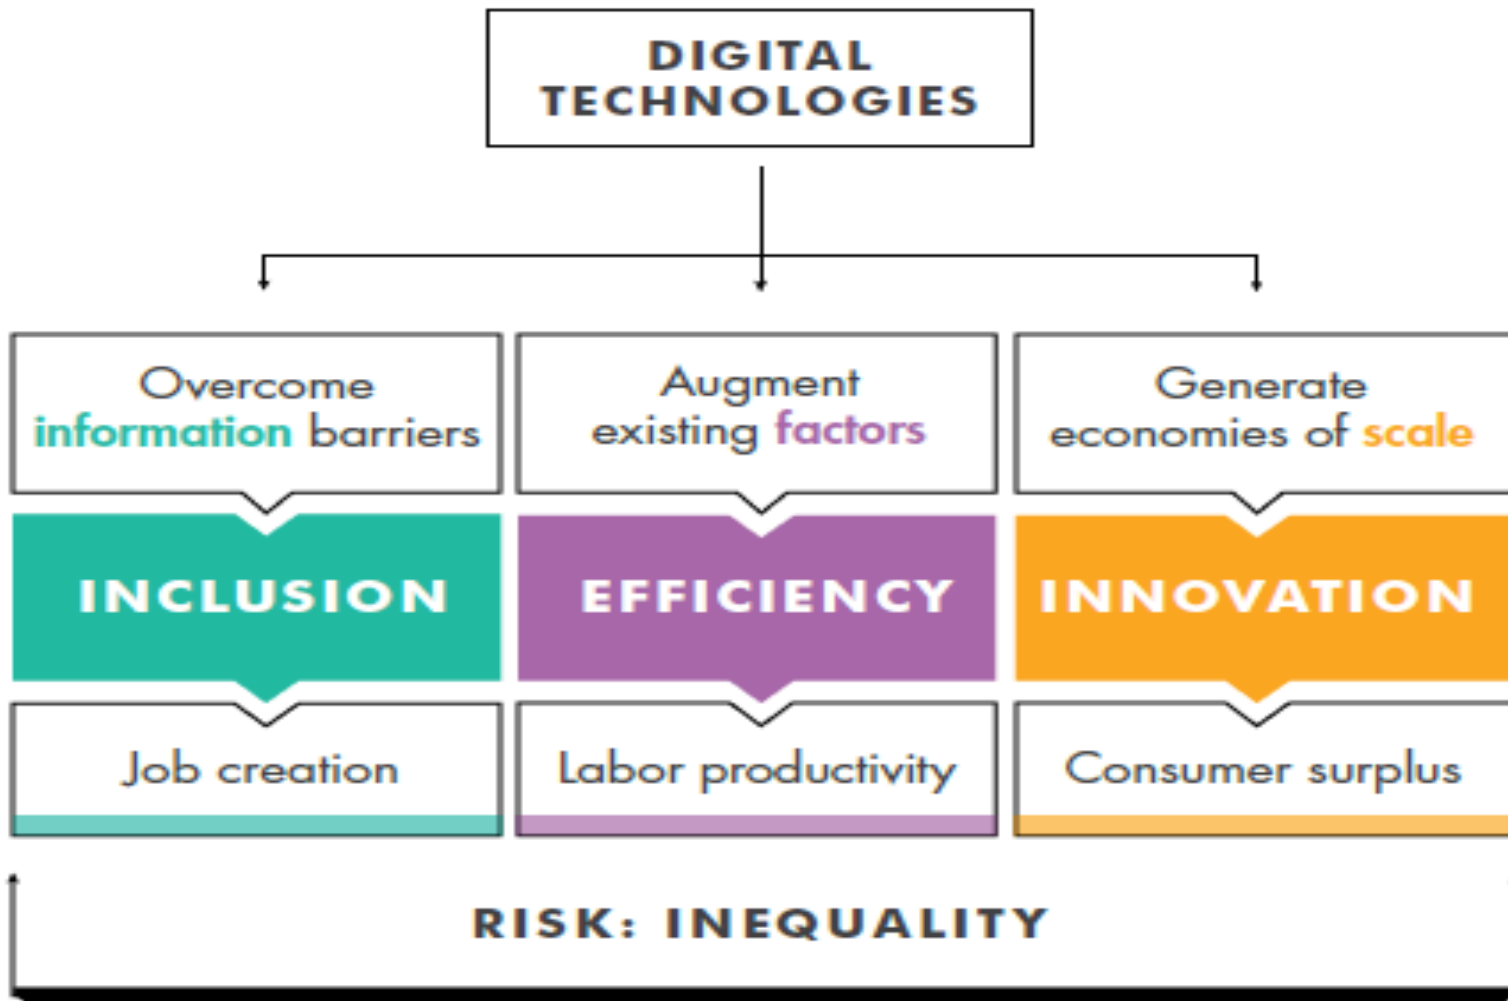

5 years

The gig Economy: A new model of employment

- [?] A significant majority of IT leaders staff their technology teams with full time employees but there is a steady growth in the number of staff of contracted labour***
- [?] Between 20-30% of working population in USA and EU15 engage with it to some degree (162 million)***
- [?] The digital revolution may be creating a shift from structural payroll to self-employment***

Source: McKinsey Institute, 2016

Cybersecurity

[?] As prominent hacks grab the headlines, the cost of cybercrime is going up.

[?] Global cost for cybercrime

- **2014: 345-445 bn\$**
- **2017: 445-600 bn\$**

[?] New job opportunities

Revolutionary Digital Technologies

- ☐ ***Cloud***
- ☐ ***Virtual Reality (VR)***
- ☐ ***Artificial Intelligence (AI)***
- ☐ ***Internet of Things (IoT)***
- ☐ ***Machine Learning***
- ☐ ***Autonomous Robots***
- ☐ ***Big Data Analytics***
- ☐ ***Augmented Reality***
- ☐ ***Enterprise Collaboration Platforms***
- ☐ ***Blockchain***
- ☐ ***3D printing***
- ☐ ***Application Programming Interface (API)***

- ☐ ***KETs***

Digital Europe and EC Skills strategy

To tackle skills gap: Smart Classroom & Digital Academies

EUROPEAN REACH

Our goal is to directly reach **400,000** young people across Europe by 2019. We've pledged this to the European Commission's Grand Coalition for Digital Jobs.

Grand Coalition
for Digital Jobs

600+

Smart Classrooms

100K

Students reached

48+

Digital Academies

6,000+

Students trained

Through both
Smart Classrooms and
Digital Academies,

9,000

teachers have been
trained so far.

Key: Number of initiatives

50+

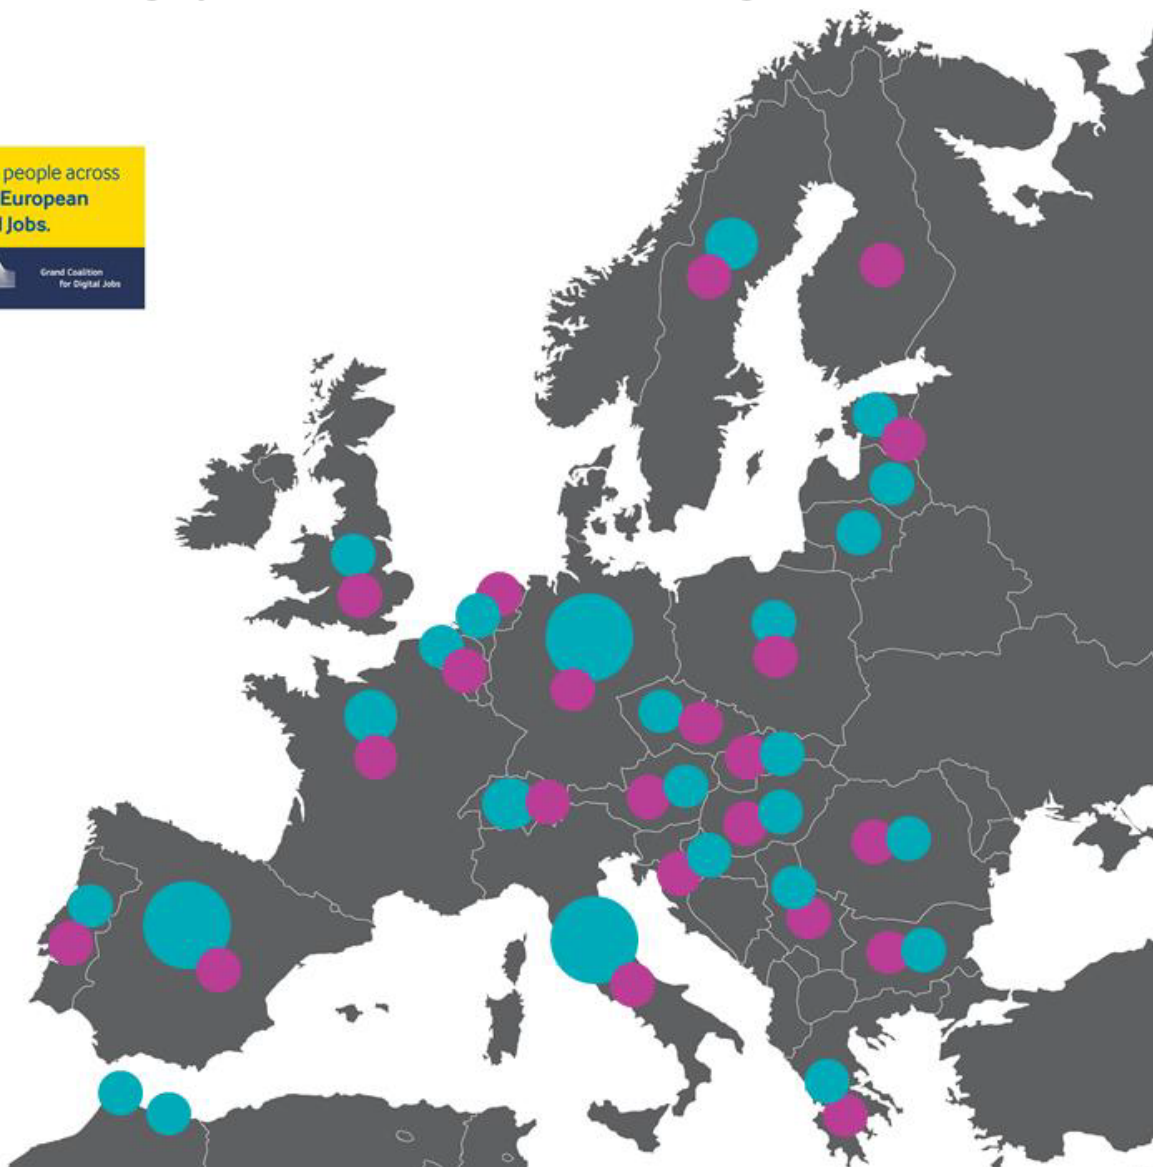

20-50

1-20

*Data sources:
Smart Classrooms and Digital Academies: October 2012–August 2015.
Beneficiaries reached: 2013–2014

Έως...

Digital Economy & Society Index (DESI) 2017

Why Greece is lagging behind

- ? Absence of national digital vision***
- ? No continuity and timeless digital strategy***
- ? Lack of PPPs***
- ? Insufficiency of digital governance model***
- ? Lack of a monitoring system and interoperability***
- ? Outdated framework***
- ? No connection and synergies between enterprises and research***
- ? Low exploitation of existing infrastructures, high dispersion of public systems fragmentation of systems of the private sector***

Greece: Digital Strategy 2020

4 Strategic Pillars

- ❑ Digital governance model, broadband, framework and digital privacy and security***
- ❑ Government 2.0 (24/7 - single access point)***
- ❑ Actions in the areas where strategic competitive advantages exist (4 areas: Traditional sectors, sectors under transition, customers facing industries and Multipliers)***
- ❑ Creation of the “Hellenic Digital Hub” (facilitator for the digital transformation of the country)***

Successful implementation of the strategy is expected to contribute to the increase of GDP by 2.6-4.0 %

Jobs & Skills

ManpowerGroup®

Skills Revolution

Robots Need Not Apply: Human Solutions in the Skills Revolution

of Greek employers plan to maintain or increase headcount due to automation

AUTOMATION IS GOOD NEWS FOR JOB SEEKERS: IF THEY HAVE THE SKILLS

Most Greek employers say digitization will be a net gain for employment in the near-term. Only 10% expect to reduce their workforce as a result of automation. As companies go digital, most will need more people, not fewer.

Jobs & Skills

Contribution of Digital Technologies to Greek GDP, 2016

GDP & Job Creations

OECD study: 10%, increase of diffusion of broadband reflects increase of GDP of 1,5% - 2,5%

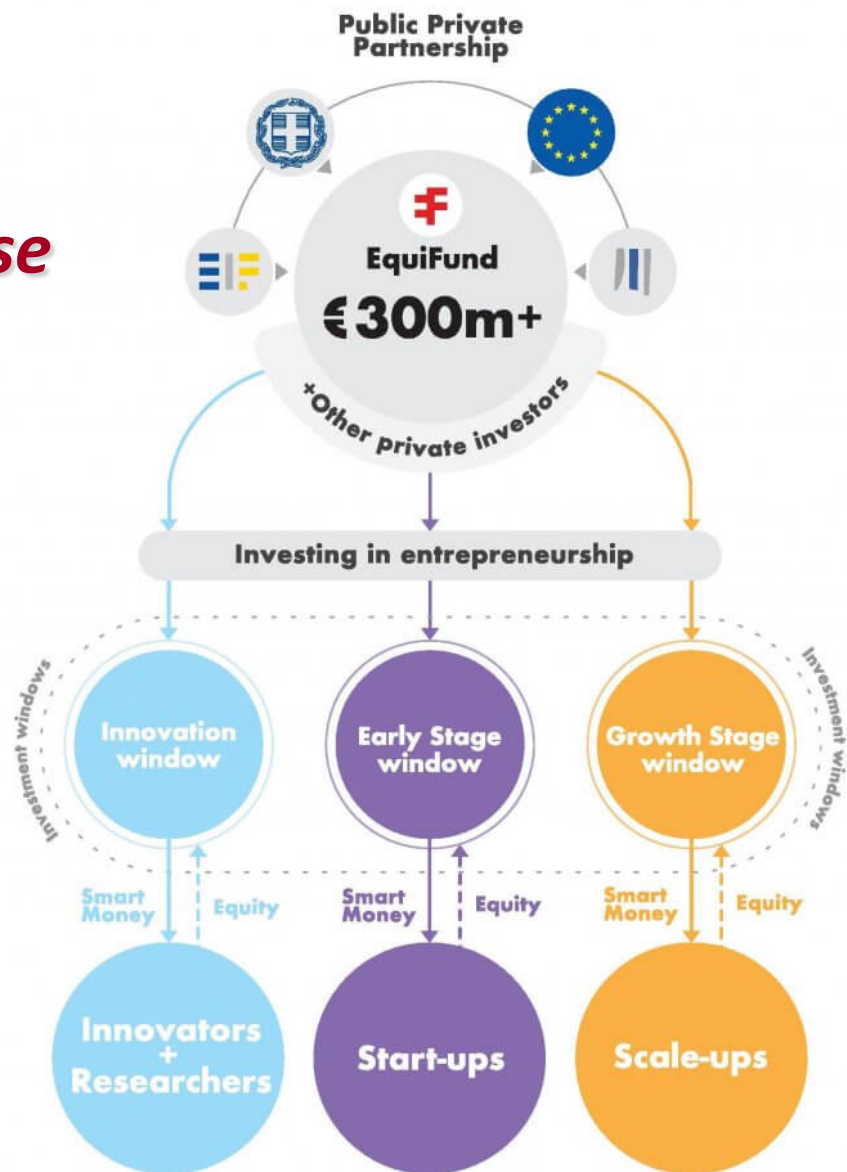

EU: Investment of €1 bn for the development of Internet, creates 9.300 new jobs

If Greece reduce digital gap and converge with the average of Med EU MS, the increase of GDP by 2021 will be €3 bn
